

PROPOSED TEXTILE DESIGN PROGRAM FOR CEDAR ROCK

Phoenix Studios, Cedar Rock's state-of-the-art textile design facility, offers accredited courses in eco-textile design and fine art to prepare students for successful, environmentally-responsible careers in the apparel, entertainment, fine art and interior design industries throughout Canada and abroad.

Through coursework and on-site production - utilizing a combination of technical skills in weaving, knitting, drawing, painting, certified dying techniques and CAD applications, students are ensured that they are learning in a collaborative environment that uses healthier technology and materials that are true to Cedar Rock's Sustainability Charter and Bylaws.

Students have the opportunity to create and market innovative lines of designer clothing and designs specific to Cedar Rock. They will be able to sell their unique creations to consumers who are interested in non-toxic, stylish, sustainable apparel and artistic artifacts.
